## TMEIC China Awarded the Honorary Title of “Excellent Centralized Inverter Supplier”

---

The evaluation results and selection of recipients of the “Shine Cup” 2014 PV Industrial Award, jointly sponsored by the well-known domestic PV industry media Solarbe.com and *Shine* Magazine, have recently been announced. In acknowledgment of its high performance and high reliability inverter technology along with affirmation from industry experts, Toshiba Mitsubishi-Electric Industrial Systems (China) Corp. (hereinafter, “TMEIC China”) was awarded the honorary title of “Excellent Centralized Inverter Supplier,” which fully reflects the high acclaim from users of TMEIC PV inverters.

The technology of TMEIC China has been passed on from its parent companies, Toshiba Corporation and Mitsubishi Electric Corporation, both of which have a long-established R&D history in power electronics products. The core technology of TMEIC PV inverters is primarily derived from mature industrial products with proven verification over many years in terms of reliability and stability. The company offers a comprehensive series of PV inverters, including 500kW, 630kW, 710kW and container-type MW-scale products. Underpinned by a long R&D and manufacturing history, outstanding conversion efficiency, ultrahigh reliability and leading performance in terms of grid connection functionality, TMEIC PV inverters are widely used in large-scale PV power plants and commercial roofs, backed by an accumulation of many successful experiences in the PV field and total installed capacity of more than 3GW.

TMEIC China was awarded the honorary title of  
“Excellent Centralized Inverter Supplier.”

### **About Solarbe.com and *Shine* Magazine**

Solarbe.com is one of the earliest Chinese photovoltaic websites with the highest daily hits and an industry following of over 300 photovoltaic enterprises from all over the world.

*Shine* Magazine is one of the most popular PV industry magazines, garnering a great deal of attention as the first globally issued bilingual (Chinese-English) publication with a large number of regular contributors from major well-known photovoltaic enterprises.

The “Shine Cup” awards began in 2011 and have become one of the most anticipated activities of the year. Through comprehensive evaluation, especially with regard to market performance and reputation, many outstanding companies have come to the fore.
