TMEIC Response to east Japan great earthquakes

We extend our deepest sympathies to those who have suffered from the east Japan great earthquakes and pray for their earliest recovery.

At present, TMEIC is very focused on company-wide efforts to support our affected customers and their damaged facilities. TMEIC factories and equipment have not suffered any serious damage. While the situation is still uncertain, TMEIC business operations are continuing and our goal is to keep all of our promised delivery dates.

We are also making every effort to reduce our electricity consumption. In addition, TMEIC will respond to every request possible toward the reconstruction of the stricken areas.
