FOR IMMEDIATE RELEASE

TMEIC's New Houston Manufacturing Plant awarded ISO 9001 Certification

ROANOKE, Va. (November 2, 2016) – TMEIC Power Electronics Products Corporation was recently awarded ISO 9001 certification for its new manufacturing facility in Houston, Texas. This certification covers quality control of the manufacturing, similar to the certification of TMEIC's plants in Japan. The new facility was opened in 2014 to manufacture and test medium voltage variable frequency drives for the North American market. Future plans are to also cover the manufacture of TMEIC's photo voltaic converters.

The ISO (International Organization for Standardization) certificate covers the design, manufacture, test, sales and service of adjustable speed drives, specifically the TMdrive-MVe2 drive, and the test and inspection of Dura-Bilt DB5i drives. Periodic audits will be conducted by ABS Quality Evaluations of Houston to ensure conformance with ISO requirements.

About Toshiba Mitsubishi-Electric Industrial Systems Corporation (TMEIC)

Toshiba Mitsubishi-Electric Industrial Systems Corporation (TMEIC) was formed in 2003 following the merger of the industrial systems departments of Toshiba Corporation and Mitsubishi Electric Corporation. TMEIC manufactures and sells variable frequency drives, motors, photovoltaic inverters and advanced automation systems for a range of industrial applications. We drive industry.

The North American operations –

TMEIC Corporation, headquartered in Roanoke, VA, designs, develops and engineers advanced automation, large AC and DC motors, renewable energy solutions and variable frequency drive systems. TMEIC Corporation specializes in the Metals, Material Handling, Oil & Gas, Solar Power, Mining, Testing and other industrial markets worldwide. We drive industry. www.tmeic.com

TMEIC Power Electronics Products Corporation, headquartered in Houston, Texas, manufactures photovoltaic inverters and medium voltage variable frequency drives.
