

Solar Ware Ninja Initial Responder and Parts Replacement Training

Technical training course covering basic operation and hands-on training for O&M providers, qualified client engineers, and 3rd party service providers.

Location: Roanoke, Virginia

- 3 day training course for engineering and maintenance personnel
- Inverter and Solar Ware® System Hardware and software operation, maintenance, and troubleshooting
- Hands-on classroom and lab exercises
- Presented by experienced industry service engineers

Students will learn:

- ✓ Fundamentals of operation of the TMEiC inverter and Solar Ware® System
- ✓ Use of the Touch Screen user interface
- ✓ To recognize normal and abnormal operation
- ✓ To troubleshoot faults
- ✓ To identify and replace defective parts
- ✓ Preventive Maintenance procedures
- ✓ TMEiC Warranty processes

Cost:
\$4,000.00 per person

Registration fees are non-cancellable and non-refundable unless notified at least one week prior to the class start date.

The class does not cover the installation of the equipment.

Solar Ware® Ninja Initial Responder and Parts Replacement

Who should attend?

Qualified Engineers and Technicians involved in the operation, maintenance, and troubleshooting of photovoltaic systems will benefit from this course.

Course Overview

TMEIC Solar Ware® Operations and Maintenance training is a 3 day course which includes a combination of classroom lecture and hands-on training. At the completion of the course, the student will have a basic understanding of the operation and maintenance of the TMEIC PV Inverter and Solar Ware® Systems. The student will be able to provide technician level troubleshooting of basic faults and replacement of parts such as circuit breakers, AC/DC fuses, circuit boards and cooling fans. Preventative maintenance procedures will be covered and the TMEIC warranty processes will be reviewed. The student will receive a Certificate of Achievement when the class is completed. Note – this course covers operation and maintenance of our inverters by the end user or service provider.

This class does not cover installation and commissioning of the equipment.

Prerequisites

- A basic knowledge of electrical concepts.
- A basic working knowledge of utility scale photovoltaic inverter systems
- A working knowledge of sound safety procedures
- A signed EHS statement plus supporting certificates must be received by TMEIC Client Training before training commences. EHS Agreement.
- Proper signed agreements- Self-Perform or Authorized Service Provider.

Typical Agenda

Day One

- Introduction to TMEIC inverters maintenance and troubleshooting
- Solar Ware® System details and station troubleshooting
- Inverter operation details

Day Two

- Inverter maintenance and preventive maintenance
- Inverter parts replacement
- Inverter troubleshooting

Day Three

- Warranty processes
- Q&A and general discussion

Student Materials

- Class presentation documents
- Technical Manuals
- Sample electrical drawings

Solar Ware® Ninja Initial Responder and Parts Replacement

Topics

- Introduction to TMEIC Power Electronics Equipment
- Walk-through of hardware components/power flow
- Electrical Drawing
- 1500V PV Inverter Installation Manual
- Inverter Operations Quick Guide
- Inverter De-energization/ Ninja Skid LOTO
- Grounding MOP
- Aux Power MOP
- AC fuse MOP for replacement
- DC fuse MOP for replacement
- Inverter web server
- Event log recordings
- SCU webserver
- Start/stop individual inverters
- Start/stop skid
- Monitoring of Modbus feedbacks
- Technical Services Team and Case Generation
- Grounding Experiential Learning Module
- Aux Power Experiential Learning Module
- Fuse Replacement Experiential Learning Module
- Power Bridge Fan MOP for Replacement
- Roof Fan MOP for Replacement
- Fan Replacement Experiential Learning Module
- AC CT MOP for Replacement
- DC CT MOP for Replacement
- CT Experiential Learning Module
- PCB MOPs for Replacement
- PCB Experiential Learning Module
- SPD MOP for Replacement
- SPD Experiential Learning Module
- Thermal Sensor MOP for Replacement
- Thermal Sensor Experiential Learning Module
- Ground Resistor MOP for Replacement
- V11 Resistor MOP for Replacement
- Output Filter Resistor MOP for Replacement
- Bleed Off Resistor MOP for Replacement
- Resistor Replacement Experiential Learning Module
- Fan Contactor MOP for Replacement
- 72C DC Contactor MOP for Replacement
- 52RC AC Contactor MOP for Replacement
- 52R Disconnect MOP for Replacement
- Contactor Replacement Experiential Learning Module
- Review of Technical Services Team and Case Generation
