## Dura-Bilt-5iMV

## 400 MTX Series Medium Voltage Drive 500 - 3000 HP

(373-2238 kW)
The Dura-Bilt5i MV MTX series of medium voltage AC fed drives deliver simple operation in a robust and compact design, providing a cost-effective solution for a broad range of applications.

The MTX's innovative, rugged NEMA 3R/UL enclosure is well-suited for applications in the most demanding environmental conditions.

The Duroa-Bilt MTX Drive delivers value through low cost of ownership and high reliability.

## Features

- Compact design
- NEMA 3R/UL enclosure
- Control System Toolbox configuration with tuneup wizards, trending, and simulator
- Graphic keypad with drive control
- Integral medium voltage fused disconnect
- Inverter power modules with medium voltage IGBTs
- 36-pulse AC to DC diode converter
- Multilevel output voltage waveform
- Sensorless vector control
- Copper wound transformer included as standard
- Transformer electrostatic shield and lightning arrestors included as standard

## Benefits

- Smaller equipment rooms and easier layout
- Rain-tight, desert-proof, $50^{\circ} \mathrm{C}$ ambient rating
- Common configuration tool across TMEIC's family of drives
- Lower-cost startups, ease of maintenance
- No operator training required
- Fewer devices for higher reliability
- Power-system friendly, IEEE 519 compliant
- Motor-friendly
- Matches drive to process needs
- Cooler operation in a smaller package
- Reliability and power disturbance tolerance

## Control I/O

| Control Area | Specifications |
| :---: | :---: |
| Analog Inputs | (2) $\pm 10 \mathrm{~V}$ or 4-20 mA, configurable, differential |
| Analog Outputs | (4) $\pm 10 \mathrm{~V}, 8$-bit, configurable, 10 mA max |
| Digital Inputs | (2) $24-110 \mathrm{~V} \mathrm{dc}$ or $48-120 \mathrm{~V} \mathrm{ac}$; (6) 24 V dc , configurable |
| Digital Outputs | (6) 50 V dc open collector 50 mA ; (5) are usually provided with interposing relays |
| Speed Feedback <br> Encoder Input | High-resolution tach, 125 kHz , 5 or 15 V dc diff. input, A Quad B, with marker |
| LAN Interface Options | Profibus-DP, ISBus, DeviceNet ${ }^{\text {TM }}$, TOSLINE ${ }^{\oplus}-$ S20, or Modbus RTU/Ethernet, ControlNet |
| Motor <br> Temperature <br> Sensor | High-resolution torque motor temperature feedback: $1 \mathrm{~K} \Omega$ platinum resistor or $100 \Omega$ platinum RTD (uses analog input with signal conditioner) |

## Display and Diagnostics

|  | Specifications |
| :--- | :--- |
| PC Configuration | Control System Toolbox for configuration, <br> local and remote monitoring, animated block <br> diagrams, dynamic live and capture buffer- <br> based trending, fault diagnostics, commissioning <br> wizard, and regulator tune-up wizards. Ethernet <br> 10 Mbps point to point or multi-drop, each drive <br> has its own IP address |
| Keypad and <br> Display | Backlit LCD, animated displays <br> - Parameter editing <br> - Four configurable bar graphs <br> - Drive control |
| Instrumentation | Two analog outputs dedicated to motor current <br> feedback, five analog outputs that can be |
| Interface | mapped to variables for external data logging <br> and analysis |
| Power Sensor | Tests each medium voltage sensor. At the <br> conclusion of the test, status of any failed sensor <br> is displayed. |
| Test |  |

## Additional Specifications

Power System Input and Harmonic Data

- Voltage: 4.16 kV, 3 -phase, $\pm 10 \%$ continuous
- Tolerates power dips up to $30 \%$ without tripping, complete control power loss ride through of 100 msec
- Frequency: 60 Hz or optional $50 \mathrm{~Hz}, \pm 5 \%$
- Displacement power factor (PF): 0.95 lag
- True PF: greater than 0.95 lag from $10 \%$ to $100 \%$ load
- $\leq 3 \%$ THD (current distortion)
- Better than the IEEE 519-1992 standard without filters
- Lightning arrestors included as standard
- Top or bottom cable entry

Converter Type

- AC fed 36-pulse diode, non-regenerative

Transformer

- Copper winding - Insulation class: $220^{\circ} \mathrm{C}$
- Electrostatic shield - Cooling: convection
- $80^{\circ} \mathrm{C}$ rise

Inverter

- NPC (Neutral-Point-Clamped) configuration
- 3300 V IGBTs for margin, minimum parts count
- Control optically isolated from MV circuits for safety

Applicable Standards

- CUL, CE UL 347A, NEMA ICS 6, NEMA ICS7, $\quad$ U $\mathcal{C}$

Safety Features

- Integral MV disconnect, door mechanically interlocked
- Door electrical interlocks included as standard

Output

- $0-120 \mathrm{~Hz}, 3 \%$ or less motor current harmonic distortion
- Five-level output for motor-friendly waveform
- Optional integrally-mounted output filter
- Top or bottom cable entry

Operating Environment and Needs

- Temperature: $-20^{\circ} \mathrm{C}$ to $+50^{\circ} \mathrm{C}$ no derating
- Altitude: Up to $3300 \mathrm{ft} / 1000 \mathrm{~m}$ a.m.s.l. no derating Up to $10,000 \mathrm{ft} / 3280 \mathrm{~m}$ a.m.s.l. with derating
Cooling
- Self-ventilated convection cooled transformer
- Sealed inverter compartment with rear insulated heat sinks
- Sealed air-to-air heat exchanger cooling of controls

Sound

- Less than 70 dBA , at $3.1 \mathrm{ft}(1 \mathrm{~m})$ from enclosure Control
- Non-volatile memory for parameters and fault data
- Vector control with or without speed feedback
- Motor simulation mode allows functional testing of system (PLC, LAN interface, and drive I/O)
- Automatic (power loss) restart function for remote applications

Vector Control Accuracy and Response

- Speed regulator: $20 \mathrm{rad} / \mathrm{sec}$
- $\pm 0.01 \%$ speed regulation with speed sensor, $\pm 0.5 \%$ without
- Torque response: $500 \mathrm{rad} / \mathrm{sec}$
- Torque accuracy: $\pm 3 \%$ with temp sensor, $\pm 10 \%$ without

Protective Functions

- Inverter overcurrent, overvoltage
- Loss of DC link
- Loss of phase \& low/loss of system voltage
- Motor overload
* Typical HP rating of a 4-pole motor; contact factory for applications on Constant Torque Loads
